PROFILE

Azure-certified GEN AI Engineer with hands-on experience building scalable multi-agent LLM systems for enterprise use.

EXPERIENCE

Data Scientist (Agentic AI) @ CAI

May 2026 - Present

1. TE Connectivity: TELme and TEVA Project

- Developed GenAI/RAG-based enterprise applications for TE Connectivity, integrating Product Data APIs and enabling intelligent natural language search across APIs, documents, FAQs, and product data
- Enhanced application performance and user experience by optimizing UI and delivering context-aware responses with API query times under 4 seconds.

Data Engineer (GEN AI) @ DataSturdy Consulting

Oct 2025 - April 2026

1. Infosys: Agentic AI system and RAG Pipeline

- Built Agent-to-Agent (A2A) communication enabling 10+ agents across 3+ business units to collaborate seamlessly, improving code reuse and functional scalability in Agentic AI workflows.
- Developed 2 MCP servers exposing 5+ tools, allowing agents to access 500+ indexes and 1,000+ databases without custom tool development.
- Migrated NER and PII detection from Azure NER to Presidio, reducing operational cost while maintaining reliable sensitive-data detection at scale.

2. Flipkart: AI-Powered Data Insight and Conversational Analytics Platform:

- Built an AI-powered insight platform that automatically generated KPIs, charts, trends, and narratives from structured datasets, significantly reducing manual report building.
- Enabled business teams to generate insights and reports in seconds via natural language, with the platform processing 10,000+ Excel files across multiple teams, driving faster decision-making.

Associate Data Engineer (GEN AI) @ DataSturdy Consulting

Nov 2024 - Sep 2025

1. Infosys: Agentic AI system and RAG Pipeline

- Developed a production-grade multi-agent system (8+ agents) serving a 300,000+ user base, acting as AI assistants that reduced manual dependency, increased productivity, and handled 1,000+ queries per day.
- Built and optimized a RAG pipeline processing 500+ enterprise documents, reducing retrieval latency by 85% and significantly improving response quality and user satisfaction.

2. Tata Power: OCR Meter Reading and Transformer Oil Image Analytics :

- Improved a district-scale OCR meter reading pipeline by identifying image-quality and preprocessing bottlenecks, driving accuracy improvements from 90% toward 95% across diverse meter types.
- Evaluated transformer oil health prediction models and demonstrated limitations of image-only approaches (60% accuracy).

PROJECTS

1. Document Intelligence Platform

GitHub Repo

- Built an AI-powered document and SQL query system enabling semantic search and insight extraction from files and relational databases.
- Implemented a multi-agent architecture with vector search and session-based context for accurate, conversational querying.

2. Conversational Data Analytics Platform

GitHub Repo

- Built a no-code conversational analytics platform enabling natural-language insights, charts, and dashboards from CSV/Excel data.
- Implemented an agent-based GenAI system to interpret queries and generate real-time analytics and visualizations.

3. Multi-Agent Incident Management AI Assistant

GitHub Repo

- Built a multi-agent incident management AI assistant using LangGraph and LLMs to route queries to specialized agents for real-time incident data and SOP retrieval.

4. Comprehensive Dementia Prediction: MRI Insights and Patient Info

GitHub Repo

- Spearheaded the development of a Comprehensive Dementia Detection system, integrating both Support Vector Machine (SVM) and Convolutional Neural Network (CNN) models.
- Achieved re-markable accuracies of 96% (SVM) and 97% (CNN) using TensorFlow.

EDUCATION

2020 - 2024	Bachelor of Engineering (Computer Science) at JSSATEB	(CGPA: 8.9/10.0)
2018 - 2020	PUC at RNS Composite PU College	(91.12)
2018	Class 10th at ST.Philomena’s Memorial High School	(93.16)

SKILLS

Programming Skills	Python, SQL, C, JAVA
Core	Data Structures, OS, DBMS, Computer Networks, FastAPI
AI and Generative AI	LLMs, GenAI, Agentic AI, Prompt Engineering, AutoGen, CrewAI, LlamaIndex, A2A, MCP, RAG and RAGAS, Google ADK, Azure Cognitive Services
ML and DL	ML, DL, Computer Vision, Feature Engineering, Model Evaluation, CNNs, Transfer Learning
Devops	AWS, EC2, S3, VPC, IAM, AMI, EBS, CloudWatch, Linux, Git, Github, Jenkins, Docker, Kubernetes, Terraform, Ansible, Prometheus, Grafana

CERTIFICATIONS

1. Microsoft Certified: Azure AI Engineer Associate (AI-102)

View Certificate

Certified as Microsoft Azure AI Engineer Associate, demonstrating proficiency in Azure AI services.

2. Microsoft Certified: Azure Data Scientist Associate (DP-100)

View Certificate

Certified in end-to-end machine learning lifecycle, including data preparation, deployment and monitoring.
